

ESPRIT in Education

Preparing the Future in Manufacturing

ESPRIT's educational program provides engineering and manufacturing students and faculty very affordable access to the world's best Windows® based CAM software. As an industry leader, ESPRIT is the ideal platform for developing skills and experience which will be widely applicable across a full spectrum of G-code programming, CNC machining, and CAD/CAM applications.

Ordering Requirements

The following must be submitted to DP to qualify for ESPRIT in Education pricing:

- A statement of intended use on the institution's letterhead signed by an official of the institution. The letter must clearly state the number of licenses purchased and that the software will be used for educational / non-commercial purposes only.
- A copy of the original purchase order from the educational institution to the reseller.

Notes:

This is not a student purchase program. Student versions are not available at this time. Commercial customers are not eligible for this program. This is for accredited academic institutions only.

The ESPRIT in Education program is a vital part of a targeted CNC programming curriculum designed to:

- Provide students access to the latest and most widely used CAM technology
- Offer complete training for all styles of CNC machining - milling, turning, and wire EDM
- Be suitable for both stand-alone CAM training or part of a CAD/CAM/CIM lab
- Simulate a practical real life solution used by tens of thousands of companies worldwide
- Minimize financial or resource investment

Eligibility

- Any accredited academic institution
- A private or public legal entity serving the general public whose primary purpose or product is education
- 2- and 4-year colleges and universities
- Vocational schools or technical colleges
- Government funded training programs

Affordable Educational Versions

- Available to eligible institutions at a significantly reduced cost, creating an outstanding value and return on investment
- Fully functional, includes all ESPRIT machining components
- Includes the ESPRIT *Getting Started* manual
- Special educational pricing for the SMC (Software Maintenance Contract) program which provides product updates. This affordable option offers technology protection by delivering up-to-date software innovations. Ask your sales representative for full details.

The ESPRIT Academic Community

In summary, the ESPRIT Education license, in tandem with the SMC program, includes the following full value additions:

- Access to the ESPRIT Internet based community: CustomerWeb, WebBoard, SupportWeb
- Technical support for the faculty and instructors
- Software updates and revisions as they are released
